

The NASPAG Fellowship Family Tree: 2015 Yael Pecchioli, MD Candidate & Mary Anne Jamieson, MD Queen's

Department of Obstetrics and Gynecology, Queen's School of Medicine

* _

Graduates of the C.A.R.E (contraception advice, research & education) fellowship, Queen's University

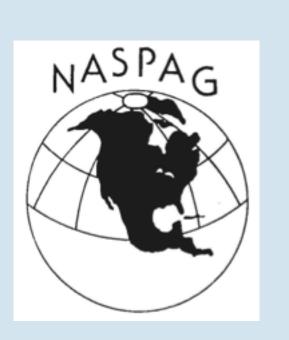

Individuals who practice PAG or adolescent ** _ medicine through reproductive endocrinology and infertility (REI).

Individuals who practice PAG or adolescent *** _ medicine through pediatric endocrinology.

Please note: Dr. Ellen Lancon Connor, Dr. Paul McDonough and Dr. John Rock have many trainees in the fields of REI and pediatric endocrinology. Only trainees practicing PAG or adolescent medicine have been included.

Our History

Established in 1986, the North American Society for Pediatric and Adolescent Gynecology was founded by physicians who recognized the need for a medical community dedicated to the promotion of education, research and communication among health professionals providing gynecological care to children and adolescents. Starting with just 88 founding members, the society has grown to over 400 physicians and nurses specializing in the fields such as PAG, adolescent medicine, REI, and pediatric endocrinology.

Our Future

The medical community continues to recognize the need for individuals with specialty training in the management of the unique medical and psychosocial issues facing girls and adolescents with gynecological problems. Rooted in outstanding fellowship programs, the number of experts in the field of PAG continues to grow.
